# Seungwook Kim

## Research Scientist, PhD Candidate

LinkedIn: Seung Wook Kim  
Github: wookiekim  
Website: wookiekim.github.io

I am Seungwook Kim, a highly self-motivated PhD candidate mainly researching on **visual correspondences of 2D images or 3D point clouds**, and their applications. I am under the supervision of professor [Minsu Cho](#) in the POSTECH Computer Vision Lab.

### SKILLS

<b>Languages &amp; Frameworks</b>	Python, PyTorch, Keras C, C++, $\text{\LaTeX}$ , Markdown
<b>Quantitative Research</b>	MySQL, PostgreSQL, AWS RedShift (but mostly MS Excel)
<b>Communication</b>	Korean (native), English (native), Chinese Mandarin (elementary)

### TECHNICAL EXPERIENCE

<b>PhD Candidate / Research Scientist</b> <i>POSTECH Computer Vision Lab</i>	<b>08 2020 — Present</b> <i>Pohang, South Korea</i>
---	--

- 2D Visual Correspondence, a.k.a wide-baseline/semantic image matching.
- 3D Visual Correspondence, a.k.a point cloud registration.
- 2D / 3D equivariance to rotation / scale (joint work with [Samsung MX](#))
- Reviewer for: WACV 2022/2023, CVPR 2022, ECCV 2022, 3DV 2022

<b>Undergraduate Intern / 3D Map construction from LiDAR</b> <i>Polaris3D</i>	<b>03 2020 — 07 2020</b> <i>Pohang, South Korea</i>
--	--

- Implemented the process of retrieving data from Intel Realsense cameras to Jetson Nano in real-time.
- Merged the two streams of data from two different angles to output a 3D map in real-time.

<b>Undergraduate Intern / Camera ISP</b> <i>SK Hynix</i>	<b>12 2019 — 01 2020</b> <i>Icheon, South Korea</i>
---	--

- Analyzed the image post-processing algorithms applied to raw images obtained from sensors.
- Identified an imbalance in the dark corners (vignetting) of a raw image from a sensor under development.

<b>Undergraduate Intern / AI team</b> <i>Netmarble</i>	<b>06 2019 — 08 2019</b> <i>Seoul, South Korea</i>
---	---

- Developed prior speech-to-3D lip synthesis pipeline to be light-weight (mobile-runnable) using TensorFlow.

<b>Undergraduate Intern / Data Engineering &amp; Analysis team</b> <i>Dable</i>	<b>02 2018 — 12 2018</b> <i>Seoul, South Korea</i>
--	---

- Analyzed heavy-traffic raw data collected at AWS RedShift using PostgreSQL.
- Developed batch codes that run regularly on the AWS RedShift to output processed data on a MySQL server.
- Analyzed processed data using MySQL.
- Developed web crawling code to identify potential blog clients.

### EDUCATION

<b>Bachelor of Engineering in Computer Sciences and Engineering, POSTECH</b> Cumulative GPA: 3.70 / 4.3	07 2020
<i>Jigok Scholarship (Full scholarship)</i>	2015 — 2020
<i>Student Mentoring Program Scholarship (Monthly scholarship)</i>	2017 — 2020
<i>On-school Work Scholarship (Per-semester scholarship)</i>	2017 — 2020
<b>Bachelor of Engineering in Computer Sciences and Engineering, Seoul National University</b> Winter session	12 2017 — 01 2018
